PROJECTS

Countries App *JavaScript, Bootstrap* <https://world-countries-app.netlify.com/>
A simple app that fetches data from Countries API based on search parameters and displays it using Bootstrap grid system

Comic Clan *React, Redux, Bootstrap, Styled Components* <https://comic-clan.netlify.com/>
React app for comic book enthusiasts. Fetching data from API and displaying it in various ways depending on category, name, etc.

T-shirt Shop *Gatsby, Stripe, Bootstrap, Styled Components* <https://custos-fidelis.netlify.com/>
eCommerce site built with Gatsby. Integrated Stripe Checkout for card payments. Built with React hooks, used Context API for state management.

2connect *React, Firebase, Material UI* <https://connect-6b966.firebaseio.com/>
Full featured social network built with React and Firebase. This app utilizes all of the Firebase's services except functions. Styled with Material-UI.

Scheduler *React, Bootstrap, Node, Express, MongoDB* github.com/tstankovic/scheduler
A full stack app that helps you organize your events. Browse days in calendar, add, remove or edit event for the day. Implemented authentication with JWT.
